### WELLNESS EXAMINATION POLICY

Comprehensive Internal Medicine is pleased to provide your Routine Preventive/Wellness examination. Due to the recent healthcare changes, it is important that you understand our policy.

As part of this examination, CIM will perform an EKG and fasting blood work. Based on your benefits, your insurance company may pay all, part or none of the cost of your visit today. Any charges not covered by your insurance carrier will be your responsibility.

In addition to your Routine Wellness Examination, it may be necessary for our Providers to add a problem oriented service (sick visit). Anything you discuss with your Provider that does not fall under a Routine Wellness Examination will be considered Problem oriented and will be billed separately as a sick visit (99201-99205 and 99211-99215) to your insurance company. This includes follow up, management and medication refills for chronic illnesses like hypertension, diabetes, thyroid disorder, elevated cholesterol or a new problem discovered upon examination. You may be responsible for a copay or deductible for this additional service.
